

TABLES GIVING ALL THE SCOTTISH MOUNTAINS EXCEEDING 3,000 FEET IN HEIGHT.

INTRODUCTION.

IN the Preface to the first number of the *Journal* it was correctly stated that there are more than three hundred mountains in Scotland whose height exceeds 3,000 feet. The exact number cannot be determined, owing to the impossibility of deciding what should be considered distinct mountains. For instance, Braeriach and Cairn Toul are always counted as separate mountains, and so are the various peaks of the Cuillins, in Skye; and yet these are no more distinct than are Sron Isean or Stob Daimh from the two main peaks of Ben Cruachan, one and a half and two miles to the west. The names of these peaks, though, are not even given on the Ordnance sheet, but are generally included under the name Ben Cruachan.

In the following tables, therefore, it has been thought best to include every "*top*" which attains an elevation of 3,000 feet; while in the first column only such as may fairly be reckoned distinct mountains are numbered.

From the tables it will be seen that there are in all 538 tops exceeding 3,000 feet in height. The whole of these are situated in the Highlands, and all—with the exception of Ben More, in Mull, and the Cuillins and Blaven (Blath Bheinn), in Skye—are on the mainland. The southernmost is Ben Lomond, in Stirlingshire; the northernmost is Ben Hope, in the north-west of Sutherlandshire; the easternmost is Mount Keen, above Loch Lee, between Forfarshire and Aberdeenshire; and the westernmost is Sgùrr na Banachdich, in the Cuillins, Skye; while on the mainland Ladhar Bheinn, in Knoidart, Inverness-shire, is the westernmost.

In Stirlingshire...	there is	1
„ Dumbartonshire	there are	3
„ Argyllshire (including one in Mull)	„	56

In the tables the following natural grouping has been adopted, the numbers in each division being as under :—

SECTION 1.—South of the Callander and Oban Railway	...	26
SECTION 2.—In the district enclosed by a line drawn by the railways from Killin Junction to Dunblane, Dunblane to Perth, and Perth to Ballinluig and Aberfeldy, and thence through Loch Tay to Killin Junction	...	3
SECTION 3.—In the district enclosed by a line drawn from Tyndrum to Killin, thence to Ballinluig and Pitlochry, and by Lochs Tummel, Rannoch, and Laidon to Kingshouse, and back thence by road to Tyndrum	...	45
SECTION 4.—In the district enclosed by a line drawn from Tyndrum to Kingshouse, down Glencoe, by Loch Linnhe to Oban, and back to Tyndrum	...	45
SECTION 5.—In the district enclosed by a line drawn from Ballachulish through Glencoe to Kingshouse, and by Lochs Laidon, Rannoch, and Tummel to Pitlochry, thence up the Highland line to Newtonmore, and thence by Loch Laggan, Glen Spean, Glen Lochy, and Lower Loch Eil to Ballachulish	...	74
		<hr/>
Carry forward	...	167
		26

	Brought forward	...	167	26
SECTION 6.—In the district enclosed by a line drawn from Newtonmore by Loch Laggan and Glen Spean to Loch Lochy, up the Caledonian Canal to Inverness, thence by coach road south to Boat of Garten, and by the railway to Newtonmore	26
Therefore the railways from Oban to Dunblane, Dun- blane to Perth, Perth to Boat of Garten, the coach road thence to Inverness, and the Caledonian Canal to Oban, enclose	— 193
West of the Caledonian Canal, and south of the road from Fort-William to Arisaig, except Ben More in Mull, no mountain exceeds 3,000 feet.				
SECTION 7.—In the district enclosed by a line drawn from Fort-William to Arisaig, up the Sound of Sleat, Kyle Rhea, Lochs Alsh and Duich, by Glens Sheil, Clunie, and Moriston, to the Caledonian Canal, and thence to Fort- William	39
SECTION 8.—In the district enclosed by a line drawn from Loch Alsh to Glen Moriston as above, by the Caledonian Canal to Drumnadrochit, thence by Glens Urquhart, Cannich, and Elchaig to Loch Alsh	53
SECTION 9.—In the district enclosed by a line drawn from Loch Alsh by Glens Elchaig, Cannich, and Urquhart to Drumnadrochit, by the Canal to Inverness, and by the railway thence <i>via</i> Dingwall to Strome Ferry, and back to Loch Alsh	26
Therefore south of the Inverness, Dingwall, and Strome Ferry Railway, and west of the Caledonian Canal (exclusive of the islands of Skye and Mull), there are	— 118
SECTION 10.—In the district enclosed by a line drawn by sea from Strome Ferry to Gairloch, thence by Loch Maree to Achnasheen, and by railway back to Strome Ferry	18
SECTION 11.—In the district enclosed by a line drawn from Achnasheen to Poolewe, by sea to Ullapool, by coach road thence to Garve, and back by railway to Achna- sheen	26
SECTION 12.—In the district enclosed by a line drawn from Garve to Ullapool, thence due east to Bonar Bridge, and by the railway to Dingwall and Garve	14	
Carry forward	...	58	337	

Brought forward	...	58	337
SECTION 13.—North of Ullapool and Bonar Bridge	...	5	
Therefore north of the Dingwall and Strome Ferry			
Railway there are	—	63
SECTION 14.—In the Cairngorms, namely, in the district enclosed by a line drawn from the Spey at Loch Insh by Glen Feshie, Glen Geldie, and the Dee to Braemar, north by Loch Builg and the Avon to the Spey, and back to Loch Insh	63	
SECTION 15.—In the Grampians enclosed by a line drawn by the Highland Railway from Blair Atholl to Loch Insh, thence by Glens Feshie, Geldie, and Dee to Braemar, by the carriage road to the Spital of Glenshee, and thence in a straight line to Blair Atholl	29	
SECTION 16.—In the Angus and Deeside Hills, <i>i.e.</i> , east of the road from Braemar to the Spital of Glenshee	...	30	
Therefore east of the Highland Railway there are	...	—	122
SECTION 17.—In the Islands, 15 are in Skye, and 1 is in Mull			16
			<u>538</u>

The tables require some further explanation.

In COLUMN 1, as previously stated, only such hills as may fairly be considered separate mountains, are numbered according to order of altitude.

In COLUMN 2 every distinct "*top*" is numbered in order of altitude.

COLUMN 3.—*Height*.—When not otherwise expressly stated, all the heights given are from the six-inch Ordnance Survey. Where only one height is given—as, Ben Lomond, 3,192—the six and one inch O.S. maps agree. When an exact height is followed by a height in smaller figures within parentheses, the former is from the six-inch O.S., while the latter is the contour height, which is all that is given on the one-inch map—*e.g.*, Beinn Ime, 3,318 (3,250): the true height as given on the six-inch map is 3,318, while on the one-inch map there is only a 3,250 contour. "Ap." following after the height, signifies that it is only approximate; the authority in most cases being careful aneroid observations taken by Dr Heddle, Mr Colin Phillip, Mr Norman Collie, Mr Hinxman, or the writer. Where *only* a contour height is given—as, Meall a' Bhàrr (Càrn Mairg)—no figure is given on the six-inch map, and only a contour height on the one-inch.

COLUMN 4.—*Name*.—The Ordnance spelling, even to the omission or insertion of an accent, has been followed in all cases. As is well known, the spelling of these maps is very incorrect. Even in one sheet, the same word is often spelt in several different ways,—Sgùrr, Sgòrr, Sgùr, Sgòr (with and without accents), Scour, Maol, and Meall,

for instance. The names, too, in the O.S. often differ from those locally used. Wherever a name is given on the O.S. map, however, it has been retained in the tables.

A * implies that the name is taken from the six-inch map, *but is not given on the one-inch.*

A † implies that the name is locally used, but is neither given on the six nor one inch maps. In all other cases the name is to be found on both the six and one inch maps. (See note on Cuillins.)

COLUMN 5.—*Position.*—The compass-bearings and distances under this heading are not absolutely accurate, but merely approximate; and the latter are measured in a straight line on the map from point to point. They are merely intended to enable the reader at once to identify the position of a “top” on the one-inch map, and are no indication of the walking distance.

As a rule, a general description is given of the principal height of a group—*e.g.*, Ben Lawers, Loch Tay, North side—or its position with regard to some well-known place—*e.g.*, Beinn Laoigh, 6 m. E. from Dalmally; while minor heights are described according to their bearing and distances from the principal one—*e.g.*, Beinn à Cliebh, 1 m. S.W. of Beinn Laoigh.

The *abbreviations*, m., for mile; N., S., E., and W., for north, south, east, and west; cont., for contour; L., for Loch; yds., for yards; in., for inch; O.S., for Ordnance Survey; and B., for Ben or Beinn, are used.

COLUMN 6.—*County.*—For the sake of convenience, Cromarty has been reckoned as Ross-shire.

COLUMN 7.—*Best ascended from.*—When the nearest hotel lies at a considerable distance from the mountain, the name of a shooting-lodge or shepherd's cottage is given first. It will be understood that in such cases accommodation cannot be counted on. The names of two hotels are often given, that nearest to the mountain being usually placed first. In a few instances, however, the hotel occupying the first place is not that nearest to the mountain; in these cases either the accommodation is better, or, though farther, the mountain is most easily ascended from that named first.

As under the heading “Position,” the distances and compass-bearings, where given, are only approximate, the distances being measured in a straight line on the map; and the compass-bearings *are those of the mountain to the hotel*, not those of the hotel to the mountain—*e.g.*, Beinn na Lap, Corrour Lodge (3½ m. N.W.), Moy (9 m. S.W.) or Roy Bridge. The shooting-lodge of Corrour is the best place whence to ascend Beinn na Lap, *which is about 3½ miles NORTH-WEST of the lodge*. Moy is the nearest inn, from which the mountain lies 9 miles S.W.; and as Moy is only a small place, Roy Bridge (Hotel) is also mentioned.

COLUMN 8.—The last column contains references to pages in the *Journal*.

The FOOT-NOTES need no explanation.

CUILLINS (SKYE).—The names of the Cuillins (so spelt in the Ordnance maps) are from Mr Pilkington's new map (see p. 235), which is more accurate than the Ordnance maps. The approximate heights of this range are from very careful aneroid observations by Mr Norman Collie.

In the SECOND TABLES the "tops" are arranged and numbered in order of altitude, only those being numbered in the *first* column which may fairly be considered separate mountains. Of these it will be seen that there are 283. In the last column the number of the section is given, and with the help of this the reader will easily find the mountain in the first tables.

Every endeavour has been made to secure accuracy and completeness. It is inevitable that there should be some mistakes, but it is hoped they will not be found very numerous. The decision as to what are to be considered distinct and separate mountains, and what may be counted as "tops," although arrived at after careful consideration, cannot be finally insisted on. I have only to add that, when first this work was commenced, I had little idea of the enormous amount of labour and research which it would entail—a labour which, even if it had not been altogether abandoned, would have been vastly increased but for the invaluable assistance given by Mr Colin Phillip, whose extraordinary topographical knowledge of Scotland has probably never been equalled.

H. T. MUNRO.

TABLE I.—THE 3,000 FEET TOPS ARRANGED ACCORDING TO DISTRICTS.

SECTION 1.

Number of Mountain in order of Altitude.	Number of Separate Top in order of Altitude.	Height. The smaller figures within parentheses are the Contour height from the 1-inch O.S. Map.	Name.	Position.	County.	Best Ascended from	See Page
179	315	3192	Ben Lomond	3 m. N. by E. from Rowardennan, Loch Lomond	Stirling	Rowardennan Inn	319

	538	3000 cont.	Creag a' Bhragait*	Between Meall na Dige and Stob Coire an Lochan	Do.	Do. do.	
	362	3140 (3000)	Meall na Dige	½ m. E. from Stob Coire an Lochan	Do.	Do. do.	

SECTION 2.

162	284	3224	Ben Vorlich	4 m. S.E. from Lochearnhead ..	Perth	Lochearnhead	120, 222, et seq.,
180	318	3189	Stùc a Chròin	1 m. S.W. from Ben Vorlich ..	Do.	Do.	Do. [319
244	448	3048	Ben Chonzie	Head of Glen Turret	Do.	Comrie (5 m.), or Crieff (8 m.)	

SECTION 3.

59	98	3547	Schichallion	4 m. S.E. from Kinloch Rannoch ..	Perth	Kinloch Rannoch or Tummel Bridge	
171	301	3200 ap. ⁴ (3000)	Creag Mhòr, Carn Maing Range ..	3 m. W.S.W. from Fortingal ..	Do.	Fortingal	132
244	3261 (3250)		Meall Liath,*	½ m. E. by S. from Carn Maing ..	Do.	Do.	132
90	155	3419	Carn Maing,	4 m. W.N.W. from Fortingal ..	Do.	Do.	132
200	3250 cont.		Meall a Bhàrr,*	1 m. W. by N. from Carn Maing ..	Do.	Do.	132
615	3000 cont.		Meall Luaidhe,*	½ m. S.E. from Meall Garbh ..	Do.	Do.	132
173	308	3200 ap. ⁵	Meall Garbh,	2½ m. W. from Carn Maing ..	Do.	Kinloch Rannoch or Fortingal	132
512	3002 (small 3000)		An Sgòr,*	2½ m. W. by S. from Carn Maing ; ½ m. S. of a point marked 3048 on 1 in. map	Do.	Do. do.	132
103	174	3370	Carn Gorm,	1½ m. N.N.E. from Free Church, Glen Lyon	Do.	Fortingal or Kinloch Rannoch Do. (4½ m.)	131 and 132
134	225	3280	Meall Gruaidh, Ben Lawers Range	3 m. N.E. from Ben Lawers ..	Do.	Fortingal or Killin	Do.
34	56	3661	Meall Garbh,	1½ m. N.N.E. do.	Do.	Killin or Fortingal	Do.
	06	3643 (3500)	An Stùc,*	1 m. N. by E. do.	Do.	Killin	Do.
147	3430		Creag an Fhithich,*	½ m. N. do.	Do.	Do. (7 miles)	87, 131, 132, 158
10	15	3984	Ben Lawers,	Loch Tay, North Side	Do.	Do.	Do.
38	60	3057 ap. ⁷ (3500)	Beinn Ghlas,	1 m. S.W. from Ben Lawers ..	Do.	Do.	
458	3040 ap. ⁸ (3000)		Sròn dha-Murchdi,*	½ m. S.S.W. of Meall Corra-naich ..	Do.	Do.	
63	106	3530 ap. ⁸ (3250)	Meall Corra-naich,	1½ m. W. do.	Do.	Do.	241
259	469	3033	Meall a' Choire Lèith,	2 m. N.W. do.	Do.	Do.	241
89	154	3421	Meall nan Tarmachan	3½ m. N. by E. from Killin ..	Do.	Do.	178
176	3369 ap. ⁹ (3250)		Meall Garbh*	½ m. S.S.W. Meall nan Tarmachan	Do.	Do.	178
240	3265 ap. ⁹ (3250)		Beinn nan Eachan*	1 m. S.W. do.	Do.	Do.	178
92	157	3407	Meall Ghaordie	Between Glen Lochay and Glen Lyon	Do.	Do. (5½ m. N.W.)	178
470	3031 (3000)		Sròn Chon a' Choirein*	½ m. E. by S. from Stuchd an Lochain	Do.	Innerwick Inn, G. Lyon (6 m.)	
191	353	3144	Stuchd an Lochain	Between Glen Lyon and Loch Girrie	Do.	Do. do. (7 m.)	

* Named only on the 6-inch map.

¹ The 3021 top is 150 yards N.E. of the point marked 2965 on the 1-inch map.

² The actual top is in Perthshire.

³ The westerly top is given on the 6-inch O.S. as 3429; the easterly, —77, the two first figures being obliterated. The height is probably therefore 3477 as above, as it is only slightly higher than the westerly top. ⁴ and ⁵ Mr Colin Phillip's aneroid measurement. ⁶ The summit is locally called Spicean nan Each.

⁷ Dr Heddle's aneroid measurement.

⁸ The writer's aneroid measurements. See p. 241.

⁹ These heights are Dr Heddle's measurements. On 21st December 1890 the writer made them somewhat higher. See p. 178.

SECTION 3—Continued.

Number of Mountain in order of Altitude.	Number of Separate Top in order of Altitude.	Height. The smaller figures within parentheses are the Contour height from the 1-inch O.S. Map.	Name.	Position.	County.	Best Ascended from	See Page

* Named only on the 6-inch map. † Local name, which is not given on either O.S. map.

1 Locally called Meall Glas Mhòr. 2 Measured by Dr Heddle and Mr Colin Phillip.

3 The point 3404 feet is a little to the S. of that marked 3399 on the 1-in. O.S.

4 The S. top of Beinn Eunaich, 3174 feet, is really only a shoulder.

5 Hugh M'Coll, stalker at Lodge at Doire nan Saor, Glen Kinglas.

6 Malcolm M'Killop, shepherd, Glenceitlin, Glenetive, 3 miles from head of loch.

	507	3004 (3000)	Top of Coire Dearg*	Do. 1 m. W. of Stob Bàn, Mamore Forest	Do.		

* Named only on the 6-inch map. † Local name, which is not given on either O.S. map.

¹ Locally known as Crèise, although the point marked Sròn Crèise on the 1-inch map is ½ mile farther N. and beyond Stob Glas Choire.

² Mr Colin Phillip's aneroid measurement. ³ Dr Heddle's aneroid measurement.

⁴ Aonach Dubh a' Ghlinne (on both the 1 and 6 inch maps) is the name of the ridge of which Stob and Fhuarain is the summit.

⁵ Malcolm M'Killop, shepherd, Glenceitlin, Glenetive, 3 miles from head of loch.

⁶ This mountain is named Meall Garbh on the 1-inch O.S., but as above on the 6-inch.

⁷ See p. 245. The north end is named An Gearanach, the south end—almost

exactly the same height, and rather more than ½ mile S.—An Garbhanach. The *arête* connecting them is extremely narrow, and the height of both must be very near, if not over, 3250 feet.

⁸ The height marked 2424, and named Sgòr an Iubhair on the 1-inch map, is merely a hump on the ridge. The top is a small 3250 contour, nearly a mile to the N. and the same distance S. of Sgòr a' Mhaim.

SECTION 5—Continued.

* Named only on the 6-inch map.

¹ Aonach an Nid, 1 mile N. of Aonach Mòr (height 3374, 6-inch map) is really only a shoulder, and not to be considered a top.

² Dr Heddle's aneroid measurement.

³ The 3000 contour—1-inch map—is about ½ mile S. of the *name* Tom na Sròine on the 6-inch.

⁴ It will be seen that although on the 1-inch unnamed and only a 3750 contour given, Stob Choire Claurigh is the culminating point of the large portion of the Lochaber Hills, of which Stob Coire an Easain appears on most maps as the most prominent. ⁵ Dr Heddle's aneroid measurement. ⁶ Height estimated by Mr Colin Phillip.

⁷ Moy (Kingshouse), 1½ mile from foot of Loch Laggan—3 rooms with 5 beds, kept by John M'Laren. No LICENSE. ⁸ It will be seen that although unnamed and only a 3500 contour given on the 1-inch map, Geal Chàrn is the culminating point of the large range immediately to the N. of Ben Alder.

⁹ Sgòr Iutharna is the "lancet edge" mentioned on pages 73, 188, and 245. Having stood on the top of it, and of every top in the district, I fancy it must be fully 3400 feet, and standing well out is almost worthy to be considered a separate mountain. ¹⁰ Bruach nan Iomairean (3175) is merely a shoulder of Marcaonich the top of which, a short ½ mile N. by E. from Bruach nan Iomairean, is 3185 feet.

* Named on the 6-inch map.

¹ Moy (Kingshouse), 1½ mile from foot of Loch Laggan—3 rooms with 5 beds, kept by John M'Laren. NO LICENSE.

² The summit named Creag Mhòr (3496 feet) on the 6-inch map is the very small 3500 contour, about ½ mile N. of the *name* Creag Mhòr on the 1-inch map.

³ Mrs Grant in "Letters from the Mountains," published 1806, speaks of the whole range as "the lofty Corryarder." ⁴ Mr Colin Phillip's aneroid measurement.

⁵ Crom Leathad is the point marked 3441 at the N.E. end, and Creag an Lochan is the S.W. end of the large 3250 contour on the 1-inch map, commencing ½ mile to the N.E. of Creag Meaghaidh. ⁶ The small 3250 contour ½ mile E. of the *name* Sron Garbh Choire on the 1-inch map. ⁷ Meal an Teanga only appears on the

O.S. maps as a 2750 contour. Dr Heddle, with careful aneroid measurements, and levels from other hills, makes the height as above.

⁸ The N. top of Gulvain is locally called Gulvain Mòr, the S. top Gulvain Beag. ⁹ Tarbert Inn is quite a small place. Inverie is perhaps preferable.

¹⁰ Dr Heddle's measurements. ¹¹ This height is taken from the Admiralty chart, none is given on the O.S. maps.

¹² Locally the Sgùrr na Creige of the O.S. is called Bidean an Dhuuill Breac, while the top, ½ mile N. of the Saddle, is known as Sgùrr n Creige.

* Named only on the 1-inch map.

† Local name, which is not given on either O.S. map.

1 Mr Colin Phillip's measurement—levels from the Saddle.

2 Locally the Sgùrr na Creige of the O.S. is called Bidean an Dhonuill Breac, while the top, ¼ mile N. of the Saddle, is known as Sgùrr na Creige.

3 The name Maol Cheann-dearg is applied to the whole ridge—both to this top and Aonach air Chrith.

4 The point marked 3276 on the 6-inch map is about 200 yards S.S.W. from the 3222 point.

5 Mr Colin Phillip's aneroid measurement in very uncertain weather.

6 The height of this top is probably nearly 3100. The only height on the 6-inch map is 3014, a little to the S. of the county march, apparently not on the top.

7 The name Sùc Beag on the 6-inch map is at least a mile N.N.E. of the 3250 contour locally known by that name.

SECTION 8—Continued.

* Named only on the 6-inch map. † Local name, which is not given on either O.S. map.

¹ A 3000 contour on the 1-inch map extends 2½ miles nearly N. and S., with an apparent width of under ½ mile. The N.W. end is Creag a' Choir Aird. No height or name is given to the southern portion of the ridge, but from the shaded 1-inch map it appears at least higher than Craig a' Choir Aird. ² Dr Heddlie's measurement.

³ According to Mr Colin Phillip, this top must be fully 3500 feet. ⁴ The point marked 3528 on the 1-inch map is incorrect. The correct height for this point given on the 6-inch map is 3559. It is, however, only a portion of the ridge of the main east summit, the real west top being ½ mile W. by N. from this point, and 3406 feet high.

⁵ This and the five following hills would be best ascended from Struy Bridge. The Chisholm Arms hotel is now closed.

* Named only on the 6-inch map. † Local name, which is not given on either O.S. map.

¹ Sgùrr Mòr is the local name. On the 6-inch O.S. this top is called Sgùrr Tuaigh.

² Measured by Mr Norman Collie.

³ Measured by Mr Hinxman, who made it well over 3000 feet.

⁴ The top lies W. from this point and is somewhat higher.

⁵ Dr Heddle and Mr Colin Phillip's measurements. This peak is certainly higher than Sgùrr Bàn and Sgùrr an Fhir Duibhe.

⁶ Both on the 6 and 1 inch maps the only height given for Slioch is 3217. On the 1-inch map, however, about 200 yards E.S.E. of this point, on which is the cairn, is a small 3250 contour. Captain Kirkwood, R.E., made a note in the visitors' book at Kinlochewe, giving the height at 3260.

⁷ Only a 2750 contour is given for this mountain. Dr Heddle and Mr Colin Phillip have both, however, made the height over 3100, which is probably nearly correct.

⁸ Mr Colin Phillip's measurement. Dr Heddle made it some 30 feet less.

⁹ Dr Heddle's measurement. ¹⁰ Mr Colin Phillip's estimate.

* Named only on the 6-inch map.

¹ Mr Colin Phillip's estimate.

² Caiplich is the highest point of Ben Bynac. The 3296 point of the latter, marked on the 1-inch map, is merely a shoulder running up to Caiplich.

³ It is difficult to decide what should be considered "tops" in the big plateau between Braeriach and Cairntoul.

⁴ Mr Hinxman's aneroid measurement.

* Named only on the 6-inch map. † Local name, which is not given on either O.S. map.

1 Sgòran Dubh. The south top is locally known as Sgòran Dubh Bheag, while the north top is called Sgòran Dubh Mhòr.

2 On the 1-inch map this hill is only called "Chaoruinn."

3 The point of which the height is given is 1½ mile N. by E. of the name Fuar Bheinn on the maps. The Perthshire sheet gives the height 3062, but the Inverness-shire sheet 3064, while the 1-inch gives it 3054.

4 150 yards S.S.W. of the point marked 3217 on the 1-inch O.S. is a point on the 6-inch 3224 feet.

5 On the 1-inch map "An Socach" applies to both tops. On the 6-inch, however, "An Socach" is only the west top, while the east top is called "Socach Mòr." The name Socach Mòr on the 1-inch map is ¾ mile E. of the top. In the Eastern Grampians it is especially difficult to decide what are to be considered separate mountains, tops, or merely shoulders. Little Glas Maol, Drui Mòr, Creag Leachdach, and Cairn of Gowal are all very doubtful tops.

SECTION 16—Continued.

Number of Mountain in order of Altitude.	Number of Separate Top in order of Altitude.	Height. The smaller figures within parentheses are the Contour height from the 1-inch O.S. Map.	Name.	Position.	County.	Best Ascended from	See Page

* Named only on the 6-inch map.

¹ In the Eastern Grampians it is especially difficult to decide what are to be considered separate mountains, tops, or merely shoulders. Little Glas Maol, Druim Mòr, Creag Leachdach, and Cairn of Gowal are all very doubtful tops.

² The writer's aneroid measurement.

³ Unnamed on the 1-inch O.S., but on Baddeley's and Bartholomew's maps called Cairn Taggart.

⁴ Carn a' Choir Bhoidheach is on Baddeley's and Bartholomew's maps called Cairn of Corbreach. Close to the crags over Loch Dubh, just N. of the Lochnagar track from Braemar, is a point 3571 on the 6-inch O.S. The hill rises considerably to the S. of the track; careful aneroid measurements by the writer on different occasions place it about 3630 feet.

⁵ The writer's measurement.

⁶ The name Little Pap on the 1-inch O.S. is about half-way between the top and Cuidhe Cròm, which is the 3552 top.

⁷ As stated in the introduction the names of the Cuillins are taken from Mr Pilkington's new map, and the approximate heights are from careful aneroid observations by Mr Norman Collie.

TABLE II.

[The immense extent of the labour undertaken by Mr Munro will be apparent even on the most cursory survey of his "Tables." Measured merely by time, the compilation has to my knowledge—for I have been somewhat of a task-master in the matter—occupied over three hundred hours during some five months. It may be affirmed without fear of contradiction that so complete, exhaustive, and instructive a list has never before been put together, and that it forms a contribution to Scottish orography whose value it would be difficult to exaggerate. There is little doubt that the lists will receive the study they deserve at the hands of all who are interested in the mountains of Scotland.—ED.]

**LIST OF SCOTTISH MOUNTAINS 2,500 FEET
AND UNDER 3,000 FEET IN HEIGHT**

By J. Rooke Corbett.

Foreword

By John Dow.

AFTER ascending all Munros and "tops," Corbett embarked on the task of visiting all the Scottish hills from 2,500 to 2,999 feet, which involved the compilation of "Corbett's Tables" as well as the work on the ground.

When the state of his health put a final end to his long series of journeys north he had not finished the job. He did, however, make out a list which was forwarded after his death to the Guide Book Editor, who has judged that, while incomplete, its publication in the *Journal* would be justified; and with this the *Journal* Editor is in agreement.

The list of 219 hills is reproduced without addition or deletion, the only amendments made being in the column headed "Position" where distances have in certain cases been reduced by reference to neighbouring Munros or easily identifiable road points. It does not differentiate between "Corbetts" and "tops"; and reference to the maps—e.g., 1-in. Ordnance Sheets 42, 43, 49, etc.—makes it clear that numerous heights of equal "merit" to those listed have not been shown. Many of the hills noted, however, are equally inviting and attractive with most of the Munros; and it is hoped that the list may be of interest to "Salvationist" members at any rate. The Sections are as in Munro's Tables—see General Guide Supplement, page vii.

Corbett was probably the best and most tireless hill walker of his generation, and love of the Scottish mountains was with him a passion pure and abiding. Let his list, therefore, be accepted as a memorial to a personality genuine and likeable, rather than as an authoritative document: and may it serve as a stimulus and a plan of campaign to those who have already ascended all the Munros (with or without the "tops") in any district.

Thus may our friendly Scottish hills, out of their inexhaustible riches, give to those who love them new pictures of beauty, and days when it is more happy to journey than to arrive; and perhaps, at some later date, we may see a revised Edition, comprehensive of every 2,500-foot summit. There might even be compiled a Supplement containing such hills below that arbitrary limit as are of outstanding interest for their form, their excellence as viewpoints, or their rock-climbing interest.

FREEDOM OF THE HILLS.

MINE is the freedom of the tranquil hills
 When vagrant breezes bend the sinewy grass,
 While sunshine on the widespread landscape spills
 And light as down the fleet cloud shadows pass.

Mine, still, that freedom when the storm-clouds race,
 Cracking their whips against defiant crags,
 And mists swirl boiling up from inky space
 To vanish on the instant, torn to rags.

When winter grips the mountains in a vice,
 Silently stifling with its pall of snow,
 Checking the streams, draping the rocks in ice,
 Still to their mantled summits I would go.

Sun-drenched, I sense the peace the hills impart;
 Storm-lashed, I hear it singing in my heart.

D. J. FRASER.

TABLES GIVING ALL HILLS IN THE SCOTTISH
LOWLANDS 2,000 FEET IN HEIGHT AND
ABOVE.

By PERCY DONALD, B.Sc.

INTRODUCTION.

IN the preparation of the following tables, free use has been made of both the popular and hill-shaded editions of the 1-inch O.S. map and of the 6-inch O.S. map. In addition, every elevation of 2,000 feet or over has been visited at least once, and many of the points examined were discarded as unworthy of inclusion as "tops." The method of determining "hills" and "tops" is described later, but it may be mentioned here that the definite policy was adopted of excluding from the list of "tops" all points of doubtful merit.

The total number of hills is 86 and of tops 133. The most northerly hill is Innerdownie in the Ochils, the most easterly Windy Gyle in the Cheviots (or Auchope Cairn on The Cheviot if tops are considered),* the most southerly Cairnsmore of Fleet, and the most westerly Shalloch on Minnoch, both in Galloway. (Extreme points in the last two cases are actually tops, *i.e.*, Knee of Cairnsmore and Shalloch on Minnoch, North Top.)

The highest hills and elevations in each county are given in the following list:—

	Feet.
Kirkcudbright	Merrick 2,764
Peebles and Selkirk	Broad Law 2,754
Dumfries	White Coomb 2,695
Peebles	Dollar Law 2,680
Ayr and Kirkcudbright	Ord. Pt. on Kirriereoch Hill 2,565
Ayr	Shalloch on Minnoch 2,528
Lanark and Peebles	Culter Fell 2,454

* Cauldcleuch Head in Roxburgh is the most easterly hill wholly in Scotland.

Roxburgh and Northumber- land	Highest ground on Union Boundary	Feet 2,422
Lanark	Green Lowther	2,403
Roxburgh and Northumber- land	Top—Auchope Cairn	2,382
Clackmannan	Bencleuch	2,363
Midlothian	Blackhope Scar	2,137
Selkirk	Top—Clockmore	2,105 ap.
Roxburgh and Northumber- land	Windy Gyle	2,034
Roxburgh	Cauldcleuch Head	2,028

The allocation of hills and tops to counties is as follows:—

	Hills.	Tops.
Perth	1	1
Perth and Clackmannan	2	2
Clackmannan	2	6
Midlothian	1	1
Midlothian and Peebles	1	1
Peebles	15	26
Lanark and Peebles	3	4
Lanark	7	8
Peebles and Selkirk	7	9
Selkirk	...	2
Peebles and Dumfries	2	3
Dumfries	8	15
Dumfries and Selkirk	6	10
Dumfries and Lanark	5	6
Ayr and Dumfries	1	1
Ayr	4	6
Ayr and Kirkcudbright	1	2
Kirkcudbright	18	27
Roxburgh	1	1
Roxburgh and Northumberland	1	2
	<u>86</u>	<u>133</u>

Grouping by heights gives the following result:—

	Hills.	Tops.
From 2,764 to 2,700 inclusive	3	3
„ 2,699 „ 2,600 „	6	9
„ 2,599 „ 2,500 „	3	4
„ 2,499 „ 2,400 „	7	10
„ 2,399 „ 2,300 „	9	17
„ 2,299 „ 2,200 „	23	28
„ 2,199 „ 2,100 „	18	27
„ 2,099 „ 2,000 „	17	35
	<u>86</u>	<u>133</u>

EXPLANATION OF TABLES.

Table I.

In this Table the following natural grouping has been adopted :—

Section.	Area.	Hills.	Tops.
1	Ochil Hills	5	9
2	Moorfoot Hills	5	5
3	Tinto	1	1
4	Enclosed by the Biggar-Broughton-Moffat roads	5	8
5	Enclosed by the Broughton-Innerleithen-St Mary's Loch-Tweedsmuir roads	13	20
6	Enclosed by the Tweedsmuir St Mary's Loch-Moffat roads	10	21
7	Enclosed by the Moffat-St Mary's Loch - Tushielaw - Eskdalemuir roads	9	15
8	Between the Abington-Moffat and New Cumnock-Thornhill roads	12	15
9	Between the New Cumnock-Thornhill and Dalmellington-New Galloway roads	6	10
10	Between the Dalmellington-New Galloway Station and Girvan-Creetown roads	18	26
11	Cauldcleuch Head	1	1
12	Cheviot Hills (on Union Boundary)	1	2
		<u>86</u>	<u>133</u>

Section 12 includes also five hills wholly in England.

An Appendix gives particulars of fifteen additional elevations not meriting inclusion as tops, but all enclosed by an isolated 2,000-feet contour. These have been included in order that the table may be a complete record of every separate area of ground reaching the 2,000-feet level.

Column 1—Name.—The Ordnance Survey spelling is always followed, a * implying that the name appears only on the 6-inch map. Where no name appears on either map the top has been given the name of its hill with N., S., etc., Top added. In all other cases the name is to be found on both the 6-inch and 1-inch maps. The number in this column is merely for convenience of reference from Tables II. and III.

Column 2—Height.—The heights given fall into three main categories. (1) Heights given without qualification are the same on both the 6-inch and 1-inch O.S. maps. (2) Heights marked thus ° are from the 1-inch O.S. map, but there is close agreement with the values given on the 6-inch O.S. map. This category comprises cases where the 6-inch O.S. surface level is 1 foot higher or lower than the corresponding 1-inch O.S. height, where a Cr. level lies within the limits of 2 feet below and 1 foot above the 1-inch O.S. height, or where a B.M. level lies within the limits of 1 foot below or 2 feet above the 1-inch O.S. height. (3) Heights not shown on the 1-inch O.S. map are in every case preceded by the 1-inch O.S. height or contour height in parentheses. If there is no further qualification the height is a surface level from the 6-inch O.S. map. If based on a level other than a surface level on the 6-inch O.S. map a footnote gives particulars. If no level is given on any map the height is marked "ap." and is an approximate aneroid observation or an estimate made by the compiler. (An estimate is only used where the height difference required is too small to be accurately measured by aneroid.)

The following points are of interest in connection with the determination of hill heights and indicate the difficulties in the way of obtaining precise values.

The popular edition of the 1-inch O.S. gives heights in relation to assumed mean sea-level, while the 6-inch O.S. is still based on the assumed mean sea-level at Liverpool, which is 0.65 foot below mean sea-level.

Heights of hills on the O.S. maps are, in general, surface heights at triangulation points. Where such point is some distance from the top an approximate aneroid or estimated allowance can be made if no top height is given on the 6-inch O.S. Where such height is apparently at the top it would usually be impossible to locate its exact position relative to the top without information and possibly personal assistance from the Ordnance Survey Department. Consequently such heights may be a foot or two lower than the true top level.

In those cases where the 6-inch O.S. gives no surface level the First Edition Cr. level can be used as a rough guide. This level may be anything down to 18 inches below ground-level. Failing both surface and Cr. levels a B.M. level can be used. Such a level is often on the side of a fence-post about 2 feet above ground-level, but may be cut on a large boulder or on native rock surface. Many of these B.M. marks have disappeared.

Column 3—County.—Tops less than $\frac{1}{16}$ mile from the county boundary are regarded as being in both counties. In this column is also given the sheet-number of the 1-inch Popular Edition O.S. map in which the top will be found.

Columns 4 and 5—Hill No. and Top No.—These give the number in order of altitude of such tops as may be considered separate hills and their subsidiary tops respectively.

“Tops” and “Hills” were determined by the following rules:—

“Tops.”—All elevations with a drop of 100 feet on all sides and elevations of sufficient topographical merit with a drop of between 100 feet and 50 feet on all sides.

“Hills.”—Grouping of “tops” into “hills,” except where inapplicable on topographical grounds, is on the basis that “tops” are not more than 17 units from the main top of the “hill” to which they belong, where a unit is either $\frac{1}{12}$ mile measured along the connecting ridge or one 50-feet contour between the lower “top” and its connecting col.

While the rules as they stand rather lack mathematical precision, the actual result of their application is that, with but few exceptions, an 80-feet drop determines a “top” and the 17-unit rule a “hill.”

Bearings and Distances.—Bearings are in all cases to the top from the reference point, whether a railway station, another top, a fence, etc. Such bearings are: in column 6 to the nearest compass point; in column 7 to the nearest 45°, except as regards bearings from ordnance points, which are usually to the nearest compass point; and in column 8 to the nearest 45°.

In column 7 "Top on N. side fence" implies that it is within 20 yards of the fence. Such descriptions as "Top N. of fence" in column 7, or "Three fences meet S. of top" in column 8 imply that the distance is less than 100 yards. Distances in excess of this are given to the nearest $\frac{1}{8}$ mile up to $\frac{1}{4}$ mile, and to the nearest $\frac{1}{8}$ mile thereafter.

Column 6—Position.—All the principal hills and many others are located from easily found points on roads or railways. Hills far from roads are located from a neighbouring principal hill. Tops are located from the hill to which they belong. The reference point on road or railway is usually one of the very many points from which the hill may be conveniently approached.

Column 7—Summit.—The information given in this column and in column 8 is intended to be of assistance in misty weather. In this column are given, therefore, any distinguishing features by which the top may be recognised. "No cairn" implies complete absence of any mark. Figures thus, "3×2," indicate the existence of a cairn 3 feet diameter by 2 feet height. If the cairn is properly built with vertical sides it is described as "Stone man" and the size given as before. Where the top has some distinguishing mark other than a cairn, this is described, *e.g.*, "Top at fence jct." or "Grassy flat 25 ft. diam." A top not at the ordnance point is located from this by approximate distance and bearing. "Top at fence" means either that the fence passes over the top, or that the summit is so flat that the top cannot be precisely located. Tops $\frac{1}{8}$ mile or more from a fence are regarded as having no fence, but for distances from $\frac{1}{8}$ mile to $\frac{1}{4}$ mile particulars are given in column 8.

Column 8—Fences.—Particulars are given of every main ridge fence and dike and of most junctions and subsidiary fences and dikes. Fence means a wire fence with wood or metal posts. Dike means a dry stone wall. Parenthetical qualifications of fences have the following meanings: "broken"—damaged condition but most of the material is present; "remains"—very dilapidated condition and most of the material is absent;

“obliterated”—the original location can only be discerned by very close examination. In order to follow this column a map showing county boundaries is necessary, and if it also shows parish boundaries, as do the 1-inch O.S. and $\frac{1}{2}$ -inch Bartholomew maps, so much the better, but this is not essential, as all parish boundary fences and dikes are also located by a bearing or direction.

Table II.

This Table gives the Scottish “hills” and “tops” only (including the two on the Union Boundary), arranged in order of height.

Columns 1 and 2 give the hill and top numbers, as given in columns 4 and 5 of Table I.

Column 3 gives the finally adjusted height only.

Column 4 gives the name, as given in column 1 of Table I.

Column 5 gives a reference to the Section number and the number of the top in that section so as to enable it to be readily found in Table I.

Table III.

This is an alphabetical index to Table I. and contains the name of every “hill,” “top,” and other elevation listed therein, and also includes names referred to in footnotes where these are likely to assist identification from tourist maps.

ABBREVIATIONS.

Abbreviations.—b., by; B.M., Bench Mark; c., contour; C.B., County Boundary; Cr., Crown Tile; diam., diameter; fr., from; ft., feet; in., inches; jct., junction; m., mile; O.S., Ordnance Survey; P.B., Parish Boundary; Sta., Station; yds., yards.

TABLE I.

THE 2,000-FEET TOPS ARRANGED

NAME.	HEIGHT.	COUNTY and 1-in. Pop. O.S. Sheet No.	HILL No.	TOP No.
SECTION 1.—OCHIL HILLS.				
1. Blairdenon Hill	2,073	Perth and Clackmannan	67	72
2. Bencleuch ¹	2,363	Clackmannan	67	24

4. The Law	2,094	do.	67	...
5. Andrew Gannel Hill * (2,150 c.)	2,196	do.	67	...
6. King's Seat Hill (2,111)	2,125 ap.	do.	67	64
7. Tarmangie Hill	2,117	Perth and Clackmannan	67	66
8. Whitewisp Hill	2,110	Clackmannan	67	...
9. Innerdownie	2,004	Perth	67	85

¹ Six-inch O.S. gives name as Ben Clach.

SECTION 2.—MOORFOOT HILLS.

1. Jeffries Corse	2,040	Peebles	74	78
2. Bowbeat Hill	2,050 °	Midlothian and Peebles .	74	75
3. Blackhope Scar	2,137 °	Midlothian	74	62
4. Whitehope Law	2,038	Peebles	80	79
5. Windlestraw Law	2,162	Peebles and Selkirk . . .	80	58

SECTION 3.—TINTO HILLS.

Tinto	2,335	Lanark	79	27
-----------------	-------	------------------	----	----

SECTION 4.—CULTER HILLS.

1. Chapelgill Hill	2,282	Peebles	79	33
2. Cardon Hill	2,218	do.	79	...
3. Culter Fell	2,454	Lanark and Peebles . . .	79	14
4. Heatherstane Law	2,055	Lanark	79	74
5. Gathersnow Hill ¹	2,262	Lanark and Peebles . . .	79	41
6. Coomb Hill	2,096	Peebles	79	...
7. Hillshaw Head	2,141	Lanark and Peebles . . .	79	61
8. Coomb Dod	2,082	do.	79	...

¹ Named only Glenwhappen Rig on many maps.

TABLE I.

ACCORDING TO DISTRICTS.

TOP No.	POSITION.	SUMMIT.	FENCES.
SECTION 1.—OCHIL HILLS.			
107	3½ m. N. b. E. fr. Menstrie Sta.	2 × 2 in N.W. fence angle .	Three fences meet; W. on P.B.; N.E. on C.B.; and S.E. slightly E. of C.B.
35	2½ m. N.E. b. N. fr. Alva Sta.	Two cairns 12 × 4 and indicator on S.W. side fence	
127	½ m. S.W. b. W. fr. Bencleuch	Grassy flat 5 ft. diam. ¼ m. W. of fence	Fence on Bencleuch ridge to Ben Ever (jets. N. to Ben Buck; and W. to Glenwinell Burn); and to Andrew Gannel Hill* and stile on Right of Way at C.B. (jct. S. to The Law).
100	¼ m. S.E. b. S. fr. Bencleuch	6 × 3 on E. side fence	
72	1 m. E. fr. Bencleuch	Top on S.E. side fence *	No fence.
89	2½ m. N.W. b. W. fr. Dollar Sta.	3 × 1, ½ m. N.W. fr. cairn; 30 × 7 at 2,111 point	
91	2½ m. N.W. b. N. fr. Dollar Sta.	Top on N. side dike	Dike on Tarmangie Hill on C.B., thence on ridge to Innerdownie (jct. fence S.E. on C.B., ¼ m. N.E. of Whitewisp, to Maiden's Well).
94	¼ m. E. fr. Tarmangie Hill	6 × 3	
128	3½ m. N. fr. Dollar Sta.	6 × 4 on N.W. side dike	

^{*} The top of rocky outcrop ¼ m. S.E. fr. top is nearly the same height.

SECTION 2.—MOORFOOT HILLS.

118	2½ m. N.E. b. E. fr. Eddleston Sta.	Hollow grassy circle 6 ft. diam. containing stones S.W. of dike-fence angle	Dike to N.W.; fence to N.E. and 2,004 point (jct. S.E. to C.B.).
114	3½ m. E. fr. Eddleston Sta.	Top in N.W. fence angle	
87	4½ m. E. b. N. fr. Eddleston Sta.	6 × 4 of old fence posts on N. side fence jct.	Four fences meet on Blackhope Scar; S.W. joining C.B. to Bowbeat Hill and Jeffries Corse (jct. W. at Leithen Water to Hog Knowes); N.W. on P.B.; to E.; and S. joining C.B. thence to Whitehope Law (jets. N.E. at 1,965 point; E. on C.B. at 1,921 point; and E., ¼ m. N. fr. Whitehope Law).
119	5½ m. N. fr. Innerleithen Sta.	Top at fence	
81	4 m. N. b. E. fr. Walkerburn Sta.	Top at fence jct.	Four fences meet; to N.W.; N. and E. on C.B.; and S.W. to 2,147 point (jct. S.E. down Seathope Rig).

SECTION 3.—TINTO HILLS.

41	2½ m. S.W. b. S. fr. Thankerton Sta.	100 × 15 with cairns 12 × 4 and 9 × 3 on top at fence jct.	Two fences and two dikes meet; fences N. and N.E. on P.Bs.; dikes W. on P.B. to Howgate Mouth; and to S.E.
----	--------------------------------------	------------------------------------------------------------	------------------------------------------------------------------------------------------------------------

SECTION 4.—CULTER HILLS.

48	3½ m. S.E. fr. Culter	No cairn .	No fence.
65	½ m. N. b. W. fr. Chapelgill Hill	3 × 2 in N. fence angle	
19	3½ m. S.E. b. S. fr. Culter	5 × 3 on W. side fence	Fences on Cardon Hill down N. and N.E. ridges; and (remains) to angle in C.B. fence to Culter Fell and Glenwhappen Rig.
113	4½ m. S. fr. Culter	1 × ½ on W. side fence	
56	2½ m. W.N.W. fr. Tweedsmuir	3 × 1 on N. side fence	Three fences on P.Bs. meet S. of top; N. to Shankhoup Burn; S.E. to Hillshaw Burn only; and S.W. to Windgill Bank.
99	½ m. N.E. b. E. fr. Gathersnow Hill	6 × 4 on E. side fence	
86	3 m. W. fr. Tweedsmuir	Top at fence	Fence on Gathersnow Hill on C.B. to Culter Fell (jct. N.E. on P.B. to Coomb Hill); and to Hillshaw Head and Coomb Dod.
105	½ m. S.S.W. fr. Hillshaw Head	Grassy flat 20 ft. diam. at fence

SECTION 5.—MANOR HILLS.

80	$1\frac{1}{2}$ m. N.E. b. E. fr. Dun Rig	9 × 5 in W. fence angle	C.B. fence is continuous Dun Rig to Locheraig Head (Section 6).
22	$5\frac{1}{2}$ m. S. fr. Peebles L.N.E.R. Sta.	Top at fence jct.	Three fences meet; to N.W.; to N.E.; and S.W. on P.B. to Dun Rig.
29	$\frac{3}{4}$ m. W.N.W. fr. Dun Rig	3 × 1	Three fences meet on C.B. and P.B.
66	$1\frac{1}{2}$ m. N.W. b. W. fr. Dun Rig	No cairn	do.
46	$3\frac{1}{2}$ m. N.W. b. N. fr. Capperleuch ¹	Top at fence jct.	Three fences meet; S. to Deer Law; and on C.B. (jct. E. near 2,283 point).
69	1 m. N. b. E. fr. Black Law	Top at fence	Fence on C.B. (remains only for $1\frac{1}{4}$ m. N.E.).
109	$1\frac{1}{2}$ m. S. b. E. fr. Black Law	Standing stone 3 ft. 6 in. height $\frac{1}{2}$ m. W. of fence	Fence N. to Black Law; and E. down ridge.
95	$1\frac{1}{2}$ m. S.E. fr. Dollar Law	Top N.W. of fence	Fence on C.B.
23	3 m. S.E. b. E. fr. Drumelzier	6 × 2 some yds. S.E.	No fence.
39	$\frac{3}{4}$ m. N. b. E. fr. Pykestone Hill	2 × 1 with post on grassy flat 15 ft. diam. on S.E. side fence jct.	Two fences meet; N.W. to Scawd Law; and N.E. (broken) on P.B. (jct. E. down ridge).
40	$1\frac{1}{2}$ m. S.W. b. S. fr. Pykestone Hill	No cairn	No fence.
103	$\frac{3}{4}$ m. W.S.W. fr. Middle Hill	do.	do.
74	$1\frac{1}{2}$ m. W. fr. Pykestone Hill	6 × 2	do.
5	$4\frac{1}{2}$ m. S.E. b. S. fr. Drumelzier	6 × 3 on grassy patch 20 ft. diam. on W. side dike	Two dikes and fence meet N. of Dollar Law; fence N.W. on P.B. ending at Long Grain Knowe; dikes E. down ridge; and S. on P.B. to C.B. fence angle.
8	$\frac{1}{2}$ m. S. b. W. fr. Dollar Law	Top at dike	Three fences meet; W. to Hunt Law; and on C.B.
3	$3\frac{1}{2}$ m. N.E. b. N. fr. Talla Linnfoots ⁴	6 × 4 on S.E. side fence	Fence on ridge S.E. to Cramalt Craig.
101	$1\frac{1}{2}$ m. N.W. fr. Cramalt Craig	Top on S.W. side fence	No fence.
96	$1\frac{1}{2}$ m. S.E. fr. Cramalt Craig	Top $\frac{1}{2}$ m. W. fr. 2,100 point	Fence on C.B. Dike fr. Polmood Burn to Wylies Burn crosses half-way to 2,723 point (4 × 3 on S. side fence).
2	2 m. N.N.E. fr. Talla Linnfoots ⁴	4 × 3 on W. side fence	Fence on ridge to Cairn Law on C.B. fence.
54	$\frac{3}{4}$ m. N. b. W. fr. Talla Linnfoots ⁴	Top at fence	

⁴ At S.E. end of Talla Reservoir.⁵ One-inch O.S. gives name Muckle Side only.

SECTION 6.—MOFFAT HILLS.

57	$1\frac{1}{2}$ m. S.W. b. S. fr. Talla Linnfoots ¹	3 × 1 on N. side dike	C.B. dike or fence is continuous Locheraig Head to Hart Fell.
61	$\frac{3}{4}$ m. N. fr. Erie Hill .	Two posts N.E. of dike	Dike W. down ridge; and E. to main N. to S. dike.
60	$\frac{3}{4}$ m. N. fr. Erie Hill .	Top W. of dike	Fence N.W. down ridge; dike S.E. to Laird's Cleuch Rig.*
55	2 m. S. b. W. fr. Talla Linnfoots ¹	No cairn	Dike N. to Garelet Hill; and S. to Din Law.
14	$1\frac{1}{2}$ m. S.E. b. S. fr. Talla Linnfoots ¹	Top at dike	Dike $\frac{3}{4}$ m. E. fr. top.
28	$\frac{3}{4}$ m. N.W. fr. Molls Cleuch Dod	do.	Dike runs Gameshope Burn (fence at first), Carlvain Hill, Molls Cleuch Dod, Firthybrig Head (joining C.B. dike).
11	$1\frac{1}{2}$ m. N. b. E. fr. White Coomb	Two turf circles, one with post, one with rain gauge, on W. side fence	Fence on C.B. (jct. to N.E. at Talla East Side) joining Dumfries C.B. dike
17	1 m. N. b. W. fr. Locheraig Head	Top at fence	Fence on C.B.
4	$2\frac{1}{2}$ m. W. b. S. fr. Birkhill ²	3 × 1 on grassy flat 20 ft. diam. $\frac{1}{2}$ m. S. of dike	Dike W. to C.B. dike at Firthhope Rig; and E. down ridge.

² Birkhill is near the Dumfries-Selkirk C.B. at the summit of the Moffat-Yarrow road.
